Santa Rosa Central Landfill

The Santa Rosa County owned and operated Central Landfill has provided solid waste disposal services since 1978. In early 2011, the Board of County Commissioners acted to improve solid waste services to county residents by franchising solid waste collections in the south end of the county, and in 2014 they extended the franchise services to the north end of the county. The solid waste franchise services reduced the number and frequency of collection vehicles in residential areas and enhanced services by including twice-weekly garbage pickup, once a week recycling collections, yard waste collection every other week and bulk and electronic-waste pickup on demand, all at a lower cost to our residents.
